SUMMARY

Full-Stack Mobile Developer with 5+ years in Flutter and 3+ years in Node.js/TypeScript backends. Founder of APIEX (AI-powered code-generation SaaS). Shipped apps to 20K+ users, cut API latency by 30%, and delivered 15+ freelance projects for international clients. Strong end-to-end product mindset from architecture through DevOps automation.

SKILLS

Mobile	Flutter, Dart, BLoC, Provider, Riverpod · iOS & Android publishing
Backend	Node.js, Express.js, TypeScript, MongoDB, WebSockets, REST APIs, JWT, OAuth 2.0
DevOps	AWS, Nginx, PM2, Docker, GitHub Actions CI/CD, Cloudflare, Let's Encrypt
AI / Tools	OpenAI API, Anthropic API, Amplitude, Sentry, Swagger, Postman, Git

EXPERIENCE

Senior Software Engineer Jan 2026 – Present
CMOLDS

- Delivering senior Flutter and full-stack solutions; architecting clean, scalable mobile and backend systems.

Senior Mobile Engineer Jul 2025 – Jan 2026
Zee Palm

- Led Tucker AI Flutter app (App Store) for 20K+ users; cut Node.js API latency by 30% through targeted optimisations.

Software Engineer Aug 2024 – Present
Tagasim Tech (formerly Sharify)

- Scaled TypeScript + MongoDB APIs for a music platform; built real-time WebSocket features; published on App Store.

Senior Flutter Developer Jan – May 2025
Binate Digital Inc.

- Shipped client Flutter apps, mentored junior developers, integrated payments and push notifications.

Mobile Application Developer Jul 2024 – Feb 2025
SparkoSol

- Built SurgeMate Pro — a healthcare surgical workflow app published on Play Store and App Store.

Senior Flutter Developer Mar – Jul 2024
Softnox Technologies

- Developed and published SAZ ME on the Play Store; led Flutter architecture and code reviews.

Freelance Mobile Application Developer Jan 2021 – Jul 2023
Upwork & Direct Clients

- Delivered 15+ end-to-end Flutter apps for international clients; maintained 5-star ratings.

KEY PROJECTS

APIEX — AI-Powered Code Generation SaaS (Founder) apiex.dev

- Generates production Node.js/TypeScript from schema definitions; pushes to GitHub; delivers Swagger + Postman collections. Self-funded, solo-built from zero to MVP with first users onboarded.
- Stack: Flutter · Node.js · TypeScript · MongoDB · AWS Lightsail · GitHub Actions CI/CD · OAuth 2.0 · Cloudflare Pages
